## **Weather of Concern**

A fall weather system will move across Northern California today spreading precipitation south and east to around the Interstate 80 corridor. Precipitation amounts of a quarter to half an inch will be possible in the Coast Range with much lighter amounts expected further inland. Snow levels will lower to around 7000 feet bringing some light accumulations to the peaks of the southern Cascade Range and far northern Sierra. For Southern California, showers will end by late morning as the upper-level trough moves east. Building high pressure will help raise high temperatures gradually through next Monday. Highs will be around 5 to 10 degrees above normal by Sunday. There are no Flood Advisories, Watches, or Warnings in effect at this time.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### NORTHERN CALIFORNIA AND CENTRAL COASTAL AREAS:

#### **Eureka Weather:**

An approaching storm system will bring cool and wet weather today. Light to moderate rain and gusty south winds will begin early this morning and persist through the day. A weak warming trend will develop late in the work week through the weekend.

#### **Medford Weather:**

Weather will be most active today as a cold front offshore and its associated cold upper level trough move inland. This will bring widespread precipitation including a slight chance of morning thunderstorms over the coastal waters to the immediate coast, cooler temperatures than on Tuesday with near record or record low maximum temperatures, and gusty southwest winds that will be strongest at the coast.

#### **Reno Weather:**

Low pressure moving inland across northern California will bring cool temperatures and breezy conditions. Light rain showers will spread across northeast California this afternoon and evening. Drier conditions with lighter winds and a warming trend are expected Thursday and into the weekend.

#### **San Francisco Weather:**

Cooler temperatures and rainfall remains on track to impact the San Francisco Bay Area later today. Further south, widespread measurable rainfall is not expected. Look for a warming trend later this week into the upcoming weekend.

# WEATHER

## WEATHER SYNOPSIS BY REGION:

### **CENTRAL CALIFORNIA AND SOUTHERN SAN JOAQUIN VALLEY:**

#### **Sacramento Weather:**

An early season weather system will move through the area today bringing a chance for more widespread precipitation south to around I-80. Cooler temperatures will continue and then gradual warming is predicted to begin Thursday and continues into the weekend.

#### **Hanford Weather:**

With the exception of isolated light showers in Yosemite National Park and some drizzle along the north facing slopes of the Tehachapi Mountains this morning, dry weather can be expected today across the central California interior with cooler than normal afternoon temperatures. Thursday through next Wednesday will be dry. Temperatures will warm dramatically by Friday and average well above seasonal normals beginning this weekend.

### **SOUTHERN CALIFORNIA:**

#### **Los Angeles Weather:**

Lingering moisture will keep some clouds across the area today, but any showers will end by the afternoon. A couple of upper level troughs will move through the western states and into the Great Basin later today through Thursday keeping temperatures below normal away from the coast. Developing high pressure aloft and weak offshore flow will bring significant warming Friday and Saturday then temperatures will be well above normal through Monday. Cooler weather is expected for Tuesday.

#### **Extreme Southwestern California including Orange, San Diego, Western Riverside and Southwestern San Bernardino Counties:**

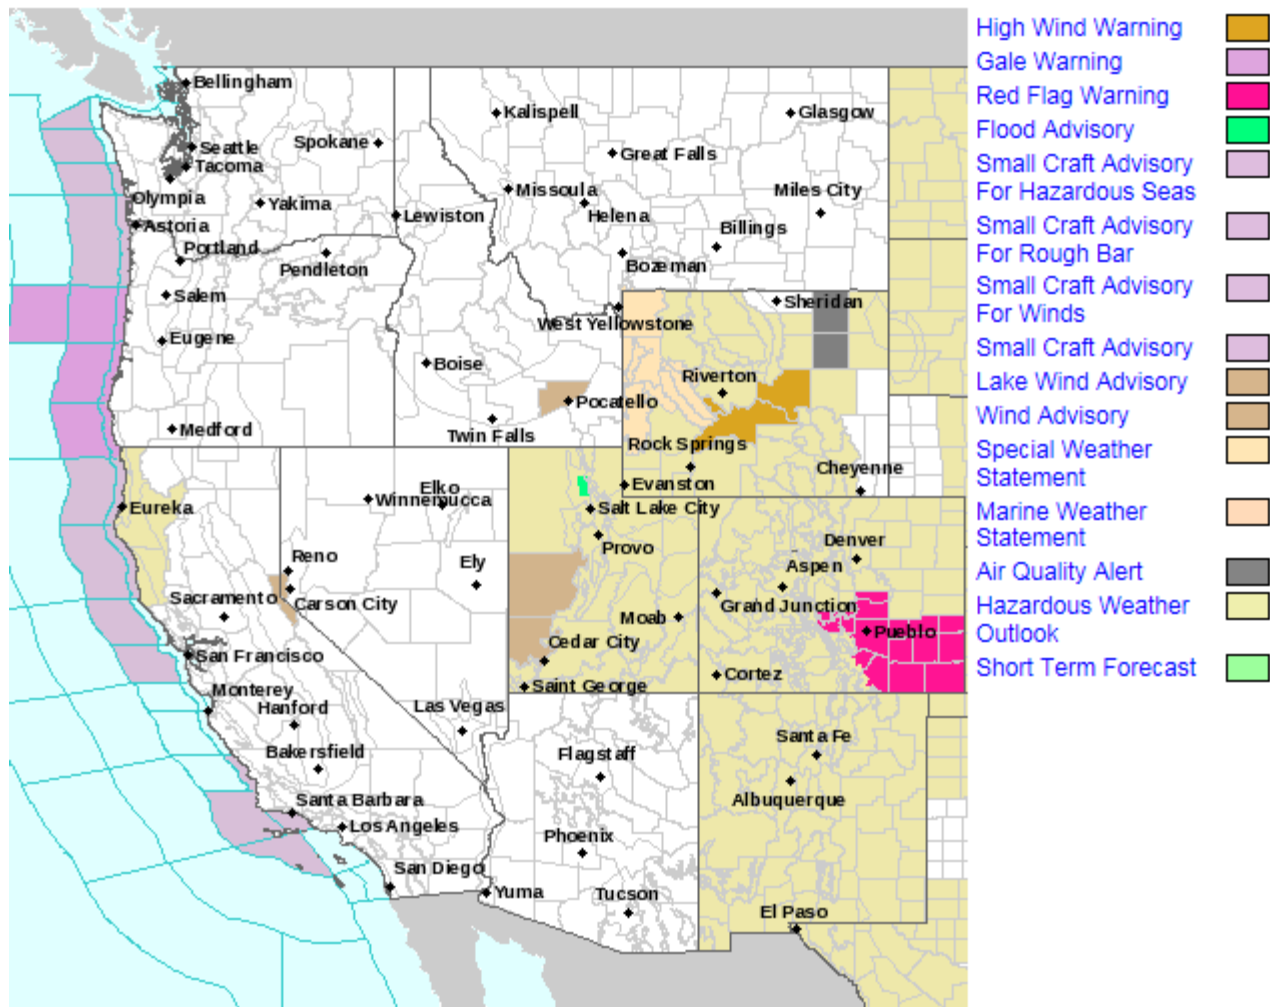

Showers will end this morning and skies will begin to clear today. High pressure aloft will build the next few days bringing a fair and warming trend. Hot weather is expected Sunday and Monday. More clouds arrive Tuesday leading to a chance of afternoon thunderstorms in the mountains.

#### **Southeast California Weather:**

Progressively drier air will overspread the next several days as westerly flow becomes firmly entrenched across southeast California. After Wednesday midday, rainfall chances will be negligible heading into the weekend. Temperatures will remain a few degrees below normal the next several days before warming to near average levels by the weekend.
